

LEGEND

-  Lewes DC Boundary
-  Flood Warning Areas
-  Flood Alert Areas

NOTES

The Environment Agency provide a free flood warning service for many areas at risk of flooding from rivers and sea. In some parts of England the Environment Agency may be able to provide warnings when flooding from groundwater is possible. The Environment Agency free flood warnings service can provide advance notice of flooding and can provide time to prepare. The Environment Agency issue flood warnings to homes and businesses when flooding is expected. Upon receipt of a flood warning, occupants should take immediate action.

The Environment Agency issue flood alerts when flooding is possible. Flood alerts cover larger areas than flood warnings and are issued more frequently. Upon receipt of a flood alert, occupants should be prepared for flooding and to take action. If a flood alert for groundwater is available this does not mean that your property is definitely at risk. It is very difficult to predict the exact location of flooding from groundwater as it is often related to local geology.

The flood warning areas and flood alert areas were downloaded from the DEFRA data services platform: <https://environment.data.gov.uk/>
